

# 400 SERIES

## *Low Profile Fixed Replacement Window*

### **The right window is finally easy to find,**

when there is just not enough space for a standard picture window. The 400 Series low profile replacement window allows for a perfect fit and will let you achieve the goal of replacing problematic wood sash frame windows. This specially designed insulated vinyl window is custom made to fit precisely into your existing opening, while maintaining the integrity of your home and eliminating the need for jam modification. Vinyl low profile windows help eliminate the rotting, shrinking, and eventual water damage that commonly occurs with wood windows. Unattended window rotting can lead to mold, pests, and potential structural damage to your home. This window by Windowcrafters is specially designed to fit into a narrow jam depth commonly found in specialty shapes in foyers, bathrooms and large picture windows. With its 1 1/2" wide low profile frame it is a perfect solution when you don't have space for a standard 3" window frame. The installation method is also similar to wood sash frame and the 400 low profile frame shows maximum glass and minimum frame commonly found in wood while having all the benefits of vinyl windows. So whether you are removing wood or metal you'll have a unit that fits just right and is backed by a lifetime warranty. The 400 Series is available in a variety of specialty configurations including half rounds, circles, eyebrows, trapezoids, sidelights and deadlights. A winning combination of functionality and beauty is finally here.

### **Functional, stylish & low maintenance:**

Vinyl windows are a winning combination of saving money by lowering your utility bills as well as minimizing exterior maintenance costs. Vinyl is impervious to rot, swelling, rust, corrosion, blistering, flaking, or infestation of termites. Vinyl windows do not require paint or attract mold and fungus, and a nice hard rain is often all it takes to keep them clean. These features inherent to vinyl make all Windowcrafters windows an impressive option for any home.

## Designed to save energy:

The 400 Series allows you to staying cool in the summer and warm in the winter while keeping your energy costs in line. All Windowcrafters replacement windows have all fusion welded frame components for maximum strength and protection from air infiltration, and water. Tests performed by the NFRC show that vinyl windows have exceptional thermal ratings. The 400 series far exceed Energy Star requirements of .40 in both UFactor and SHGC, and with 2 levels of energy efficient glass to choose from you will have superior energy saving year round. Featuring a 7/8" insulated glass unit filled with Argon gas utilizing the Dura platform warm edge spacer system. Dura Platform contains no metal which means your windows will be warmer in the winter and cooler in the summer, making your home more comfortable year round. Dura Platform technology is the most advanced on the market helping ensure your new windows will not have an ig unit seal failure.

All Windowcrafters windows feature the Cardinal group of LoE glass products. Cardinal provides the ideal balance of solar control, exceptional SHGC ratings and high visible light transmission. Weather you choose LoE-270 which is the perfect glass for fighting the heat in our regional climate or LoE-366 for ultimate solar heat reduction your windows will be specially designed for year round comfort and exceptional energy efficiency.
