900 Series

Single and Double Hung Vinyl New Construction Windows

It has never been easier to have the right windows in your new home. The 900 series windows combine the beauty of a classic wood window with the performance needed to meet and exceed today's tough energy standards. You will enjoy year round comfort, long lasting performance, low maintenance and energy efficiency. No matter where you live, the style of your home, the 900 series is an investment worth making. You'll have the look you want with the piece of mind that your new home has windows built to last a lifetime.

Materials

Beauty, style and strength are evident in this all fusion welded high performance window. From a smooth uncomplicated interior, to the decorative brick mold exterior, this window captures a classic look. Our NFRC certified window is designed with AAMA certified vinyl profiles, dual pane Comfort TI LowE glass, Dura Platform warm edge spacers, and BSI inverted balances which are designed to perform in new construction environments. Your new windows will provide exceptional performance.

Energy Performance

In today's environment it's more important to make the right choice in windows for your new home. With energy costs at an all time high our 900 series windows are a solution guaranteed to perform. The glass, spacer and construction of a window all affect the overall U-factor and SHGC. The 900 series windows are manufactured with materials that work well together as a system to produce a high performance window with exceptional NFRC ratings. Choose the 900 series vinyl new construction windows for your new home so it will be energy efficient, comfortable, and low maintenance.

Our windows are:

Energy Star Qualified
NFRC Certified Windows
AAMA Certified

Our products are certified by the National Fenestration Rating Council. NFRC develops and administers comparative energy and related rating programs that serve the public.

Energy Star is a joint program of the U.S. Environmental Protection Agency and the U.S. Dept. of energy helping us all save money and protect the environment through energy efficient products and practices.

Vinyl windows in your new home will reduce drafts, quiet outside noises, maintain interior temperatures, save energy cost and provide a long term low maintenance solution for your home.
